FCC Broadband Measurement Program

Agenda

- Frame context for working on next report
- SamKnows presentation on schedule and work assignments

Focus on Next Report

- Maintain current data collection process for next report
  - This will allow us to focus on next report which all parties agree is of great benefit to the public
  - Attempt to reach consensus over time on recent issues
- Improve current process to minimize conflicts

Proposed Process Improvements FCC

- Standing NDA
  - Providing access to data for limited purposes of network diagnostics
  - Data still covered by FCC policy on data publication

Proposed Process Improvements ISPs

- ISP Data loss policy
  - Up to 7 days data loss can be accepted without impact
  - When feasible, loss > 7 days can be compensated by extending collection period into following month
  - FCC will be final authority for decisions on dropping days or extending collection period

Proposed Process Improvements M-Lab

- M-Lab will manage resolution of all issues affecting operation status of server platform

- M-Lab will seek to improve diagnostic capability to detect 'soft faults'

- M-Lab will create an open event log covering
  - Planned outages
  - Unplanned outages
